PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER:	5100 (Tng)	SESSION NUMBER:	1
DATE OF SESSION:	01 MAY 90	DATE OF REPORT:	07 MAY 90
START:	1035	END:	1515
METHODOLOGY:	CRV	VIEWER IDENTIFIER:	052

1. (S/SK) MISSION: To describe the target site (Spacenet III Telecom satellite) in Stage 4 terminology.
2. (S/SK) VIEWER TASKING: Encrypted coordinates only.
3. (S/SK) COMMENTS: No Physical Inclemencies. 052 "relearned" several old lessons on this target when tasked to describe the surroundings of the satellite (there are no surroundings). Internal AOL and a desire to produce information led 052 to struggle, and drove strong AI breaks. Finally, in desperation, 052 gave up and said that trying to perceive the satellite's surroundings produced only empty blackness. Immediate feedback of "correct" was given, and a long break was taken, to discuss how a series of strong AI's can sometimes be an indicator of hidden AOL (in this instance, the natural expectance that something would be there), and that the only way around such drive is to declare everything in simplest terms, and then take a full break. A break was taken until late afternoon (hence the length of time between start and end times).
4. (S/SK) EVALUATION: 3
